

Product Manager (m/f) – IoT Air Quality Monitoring / 100%

About IQAir

IQAir AG is a worldwide leader in measuring and improving air quality. We help people lead longer, healthier lives by protecting them from air pollution and allergens at home, at work and on the go. At our Swiss Technology Center we develop and produce IoT air measurement devices and air purification systems for private, public and clinical applications. Our customers are governmental agencies, schools, medical facilities, Fortune 500 companies, embassies and health conscious individuals in over 100 countries. Our mobile air quality -app AirVisual and air quality data platform is used by over 50 million people around the globe.

We are seeking a Product Manager to oversee our line of low-cost IoT air quality monitoring devices. This role bridges technical expertise with commercial support, ensuring our products meet customer needs and integrate seamlessly with our monitoring platforms.

You will serve as the key link between Sales, Customer Service, and Engineering, providing in-depth product knowledge, coordinating improvements to hardware and firmware, and driving continuous product innovation.

Your Tasks

- Support Sales and Customer Service teams with product expertise, documentation, and technical clarifications
- Act as the product champion, maintaining a deep understanding of the hardware, firmware, and IoT platform integration
- Gather customer feedback and translate it into actionable product improvement plans. Work with engineering teams to define and prioritize product enhancements and firmware updates
- Collaborate with software and platform teams to ensure smooth device-to-platform integration and data reliability
- Manage product lifecycle, from concept and testing through production and deployment
- Maintain detailed technical documentation, specifications, and release notes

- Assist in field trials and quality assurance testing to ensure performance and reliability
- Monitor market trends and competitor products to identify opportunities for innovation and differentiation

Our Requirements

- Bachelor's degree in Electrical Engineering, Electronic Engineering, or Computer Science (Master's degree a plus)
- 2–5 years of relevant experience in product management, technical support, or hardware-based IoT products
- Strong understanding of IoT technologies, sensors, and wireless communication protocols (e.g., Wi-Fi, LoRa, NB-IoT)
- Familiarity with firmware development processes and cloud-based data platforms
- Excellent communication and coordination skills across technical and non-technical teams
- A proactive, hands-on approach to problem-solving and product improvement

Our Offer

- Work at the intersection of IoT technology, environmental monitoring, and innovation
- Collaborate with a passionate international team working to make clean air measurable and actionable
- Opportunity to grow with a expanding product line and global customer base

Place of Work

9323 Steinach, Switzerland
